Bryan C. Winter  
Full Stack Web-Developer  
<https://www.linkedin.com/in/bwinter20/>

Development is one of the few disciplines where art, philosophy and science all meet at the same place. I am a self-taught full-stack web developer with a bit of a nerdy passion for all three. I have been developing for over 6 years, both professionally and personally. I've spent time working both in Support and QA departments so I have a good sense of how to build something that is beautiful, functional, and that doesn't create future unmanageable code debt. I pride myself on a disciplined approach to development that focuses on maximizing flexibility in order to better deal with changing and uncertain requirements. Good code isn't about clever hacks. It's about clarity of intent and maintainability.

There really is no greater joy in the world than building something cool that solves a real problem. Let me build something for you!

## Development Experience

Surfmerchants

01MAY2012 To Present

- Designed and Implemented **Scorez**, a client side scripting language that scores large data sets with support for math and conditional logic.
- Rebuilt Shopper billing architecture to support dynamic, arbitrary and customizable by client billing fields.
- Completed over 100+ projects, including front end reports, API Interfaces, back end data manipulation, bulk e-mail triggers, and large cronned exports in support of clients like Toyota, Microcenter, Nieman Marcus and Discount Tire.
- Presented new and old products at the *Sassie Summit* conferences in 2013 and 2016.
- Lifelong Learner - Advanced quickly from Tech Support, though QA Engineer and then to a Full-Stack Developer position.

## Other Experience & Education
